DETAILED ACTION

1. Claims 1 – 24 are pending.

Allowable Subject Matter

2. Claims 1 – 24 are allowed.
3. The following is an examiner's statement of reasons for allowance:

Claims 1 – 24 are allowed because the prior art of record fails to teach or suggest alone or in combination ***placing a hardware reset request in a software communication request queue and processing the requests from the queue in serial order, the hardware reset request being processed when all requests from the queue currently being serviced have completed being serviced***, as required by independent claims 1, 9, and 17, ***in combination with the other recited claim limitations*** (emphasis added). Support for this limitation can be found in the originally filed specification on page 11 lines 4 – 19 and also in figure 4. The prior art of record, US Patent No. 6,757,772 (hereinafter Ono), teaches delaying a hardware reset request until software communication requests are completed, but does not teach placing the hardware reset request in a physical software communication request queue. The applicant, on pages 12 – 15 in the appeal brief filed on 14 February 2007, has argued this point.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
